PROFESSIONAL SUMMARY

Final-year Computer Science & Engineering student with a strong foundation in **Python, Data Structures & Algorithms, backend development, and AI/ML systems.** Hands-on experience building deep-learning applications using TensorFlow and Keras. Solved **100+ DSA problems** with consistent progress in problem-solving. Seeking a Software Engineering or Python Backend Developer role where I can contribute clean, efficient code and continue growing rapidly.

TECHNICAL SKILLS

Languages	Python (primary), Java, C, SQL
Backend	Flask, Django, REST APIs, JSON
AI / ML	TensorFlow, Keras, Convolutional Neural Networks (CNN), Deep Learning
Frontend	HTML5, CSS3
DSA & CS Core	Data Structures, Algorithms, OOP, DBMS, Operating Systems
Cloud & DevOps	AWS (EC2, S3, IAM), Git, GitHub
Tools	VS Code, Eclipse, Linux (learning)

PROJECTS

Fake Logo Detection System • AI / Deep Learning *2024*

Python · TensorFlow · Keras · CNN · Flask

- Designed and trained a CNN model to classify brand logos as genuine or fake, applying data augmentation to improve generalisation on unseen samples.
- Packaged the trained model into a Flask web application for real-time browser-based logo verification — demonstrating full end-to-end ML deployment.

Fingerprint-Based ATM Authentication • Security / Biometrics *2024*

Python · Biometric Sensor APIs · SQL

- Replaced PIN-based ATM authentication with fingerprint biometric verification, eliminating the risk of PIN theft and unauthorised access entirely.
- Built the backend authentication pipeline in Python, connecting a fingerprint sensor to a SQL database for real-time identity matching with reliable accuracy.

AI Grammar Correction System • NLP / Web Application *2024*

Python · NLP Libraries · HTML · CSS

- Built an NLP-powered grammar correction tool that analyses user-submitted text and returns corrected output with contextual explanations of each fix.
- Developed a responsive HTML/CSS frontend connected to a Python backend handling tense correction, subject-verb agreement, and punctuation normalisation.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering *2023 – 2026*
Government Engineering College, Chamarajanagar | Visvesvaraya Technological University (VTU)
CGPA: 7.6 / 10 (ongoing)

Pre-University Certificate (PUC) — Science *2022*
MDR PU College, Savanur, Haveri
Score: 95.5% — Top 5% of cohort

SSLC — Grade 10 *2020*
MDRS School, Bevinahalli, Savanur
Score: 92.4%

EXPERIENCE & CERTIFICATIONS

Cloud Computing Internship • Amazon Web Services (AWS) *2024*

- Completed structured AWS training covering EC2, S3, IAM, and cloud architecture; deployed a sample application on EC2 from provisioning to configuration.
- Earned a completion certificate in Cloud Computing, demonstrating practical proficiency in cloud infrastructure and deployment workflows.

ACHIEVEMENTS & ACTIVITIES

- **100+ DSA Problems Solved** — Actively solving Data Structures & Algorithms problems in Python with a consistent focus on time and space complexity optimisation.
- **Hackathons & Technical Events** — Participated in 3+ hackathons and coding competitions across Mysore city, collaborating in teams to build and present rapid-prototype solutions under time pressure.
- **State-Level Athlete** — Secured 4th Place in the State-Level Javelin Throw championship, reflecting strong discipline, goal-oriented training, and the competitive mindset that directly translates to professional performance.

CURRENTLY LEARNING

- **Advanced DSA in Python** — Graphs, Dynamic Programming, Trees, and Recursion; targeting top-tier SWE interview preparation.
- **Linux & System Administration** — Shell scripting, file systems, process management, and networking fundamentals.
- **System Design Fundamentals** — Scalability, load balancing, caching strategies, and API design best practices.
